Request for reliable **YEAR-ROUND** supply

BENEFITS

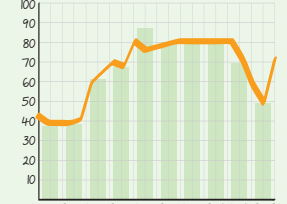

+ 25% compared to umbrella

HIGH PRODUCTION

Higher **PROFIT**

PLANNABLE, balanced and more efficient **LABOR**

Year-round **HIGH QUALITY** fruits

Nunhems High Wire varieties for Canada

SEpire

SEpire is a very strong and open variety. Even during unfavorable circumstances, as during the hot summer season, the plants stay vigorous and the fruit quality remains constantly high. SEpire produces easily long fruits and is a variety that will give you a high percentage of mediums at the start of the crop. The variety is highly resistant against CGMMV, CMV and PM making it a reliable crop. SEpire is very suited for high wire cultivation, but also for umbrella system.

Beesan

Beesan is a very strong and open single fruited type. The fruit weight is between 80 and 110 grams, depending where you are aiming at. Due to its single fruitedness, Beesan gives you a very reliable and consistent production. The fruit quality of Beesan is high, with a nice color, crunchiness and a very good uniformity. The variety has an intermediate resistance against PM, providing you security. Due to the vigor it is very suited for high wire cultivation, also for a longer cycle. Beesan is for the umbrella system as well.
